Interaction of round shapes

L-IOT

Christine Rathmann

lande

L-IOT is a sidetable with a round wooden tabletop and a round metal base.

“The striking design feature of L-IOT is the interaction of radii”, tells German designer Christine Rathmann.

Characteristic of the design of the L-IOT is the interaction of round shapes of the foot and tabletop. “The striking design feature of L-IOT is the interaction of radii, which seems straightforward, but represents a static challenge”, tells designer Christine Rathmann. “The design language is unconventional and exciting. This turns the L-IOT into a statement.”

The L-IOT side table is available in heights of 42 cm and 51 cm. The low version has a tabletop with diameter 50 cm and the high version with diameter 40 cm. The tabletop and base can be executed in a wide variety of colours.
