

MC sofa

Lande Design Team

The MC sofa is a wagon sofa with a simple design and a host of possibilities. The basic version has a number of permanent features that you can vary to suit your needs. There's also a wide choice of finishes to personalise the sofa.

The MC sofa has a comfortable, high-quality foam seat and backrest. The backrest is slightly angled to make it a pleasant place for an active discussion or to eat lunch. The tight-fitting upholstery is available in a wide range of colours.

Applications

The MC sofa is ideal for places where you want people to shuffle up, such as a clubhouse, restaurant, waiting room or a flexible working environment. It can be used free-standing, in a seating arrangement, back to back, or placed against a wall. Sofas can be linked together and can be fully customised. The wagon sofa can be upholstered in various fabrics and (artificial) leather.

Details

Free-standing elements have an upholstered back. The elements can also be placed back to back.

Materials

The solid frame of the MC Sofa System is made of formaldehyde-free chip board and plywood in various thicknesses.

The sofa is covered with a layer of foam and Dacron in combination with an ingenious perforated pattern, ensuring years of comfort. The plywood skirting has a top of laminate. If no colour is indicated, it will be produced in standard L08.

Technology

All of our products are produced to a high standard. This enables us to use our production machinery to best advantage. The machines that process wood, metal, fabric and foam are CNC-controlled, which guarantees millimetre-fine precision and constant quality.

Options

A 230V electricity socket can be built into the skirting. The standard sides are finished in laminate from our standard laminate collection. Veneer and fabric finishes are available optionally.

Measurements

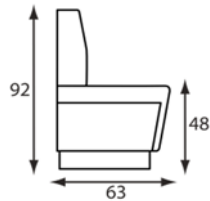

Height: 92/117 cm
Width: 80/100/120/140/160/
180/200 cm
(specials on demand)
Depth: 63 cm
Depth free standing: 65 cm
Height seat: 48 cm

Upholstery

MC-sofa can be upholstered in various fabrics and (artificial) leathers. Elements which are larger than 100cm in leather will have an extra stitching in the middle.
