*Easy office and  
conference swivel chair*

THE JOY OF WORK

Work used to be an emotionless way of earning a living. But today it is becoming a more meaningful part of life where it is important to actually enjoy what you do. This development is reflected by offices being transformed into rooms that provide more freedom and results in designs such as se:joy.

A modern design, comfortable seating and intuitive functionality make it perfect for all office areas where movement is the order of the day – be it conference rooms, zones for temporary project work or home offices. se:joy is all about fun – not least because it is excellent value for money.

## PLEASES EVERYBODY WITHOUT MAKING COMPROMISES

Comfortable seating can be quite a challenge when different employees use the same workspace. After all, preferences vary and all users – whether tall or small, slim or sturdy – want the seat to be comfortable as soon as they sit down. But they don't really have much time to adjust the seat to their preferred position in a conference room or at a touchdown workstation. Other things are more important at that moment and it has to be just right straight away. Conditions, which allow se:joy to proudly demonstrate its strengths. It provides ergonomic seating comfort from the very first second – for everybody.

## MORE HOME, LESS OFFICE

The home office is becoming an integral part of the modern working world for more and more people – either as an extension of their office desk or as their main workplace. And there are differences in how often the home office is used. But there is a common trend when it comes to furnishings. They need to be appealing and reflect the personal style, which is even more important when the office is at home. A case for se:joy, primarily a modern swivel chair that people also like to have in their own home.

# COME IN, SIT DOWN, FEEL GOOD

## COMFORTABLE AND ERGONOMIC

The filigree single-piece supporting structure enables optimum pressure distribution along the spine without any adjustment. The sophisticated construction features a newly added “comfo flex” zone in the lower part of the supporting structure, which enables dynamic seating as well as freedom of movement and adapts automatically to each user, regardless of shape or size.

## DYNAMIC AND CONCENTRATED

Due to its opening angle, the finely balanced rocker mechanism allows a comfortable seat tilt (4° front / 7° rear). The “comfo flex” zone, a recess in the lower part of the backrest, provides for a synchronous effect which allows even more flexibility. se:joy can thus follow the seating position of the user and support active or relaxed sitting, depending on the situation. The mechanism is locked by means of a slider.

## HIGH-QUALITY

Innovative fabric structures in the seat and backrest provide a supportive seat as well as an adaptable backrest, which will not stretch over time. se:joy combines long-term seating and product quality.

## INTUITIVE AND FLEXIBLE

The elegant adjustment lever on the underside can be used to adjust the seat height between 390 mm to 510 mm.

## LOGICAL

Soft and hard castors are available, depending on the flooring. The colour of the castors matches the chosen frame colour.

ORANGE

OLIVE GREEN

SAND

LIGHT GREY

ANTHRACITE

Fresh colour combinations for the mesh cover (five colours) and carcass (black and light grey) enable se:joy to be adapted to personal preferences or the interior design. The wide range of possible combinations allows for many different looks. From young and trendy to sleek and elegant. Which se:joy will make your day?

## DESIGNED TO PLEASE

Understated and strong? Dynamic and modern? Light and fresh? se:joy boasts many features. The harmonious lines and a design inspired by nature stand out. The delicate yet durable supporting structures reflect an independent character, which not only complements sophisticated surroundings. se:joy adds an inspiring, refreshing touch to virtually any office environment and interior design style.

se:joy is available in two frame colours, black and light grey. The ergonomic armrests blend harmoniously into the lines, accentuating the dynamic character.

## COMPANY OF THE FUTURE

Company:

se:joy:

The ergonomic features and the quality of the materials used are not the only reasons why Sedus products feel good. The principles according to which they are developed and finished are also a contributing factor. These principles include ecological compatibility, conservation of resources and recyclability. Principles, which have been defining the way Sedus does business for more than 50 years. Out of a sense of responsibility for the future.

**“se:joy**

*Its light design makes se:joy the ideal partner for agile work situations, where it impresses with its comfort and dynamic character.”*
